

Electrical Trading
Company in UAE
Since 2005

King Power Electrical
Accessories Trading

Introduction

King Power Electrical Accessories Trading - is a company based in Abu Dhabi providing specialized electrical equipment for the U.A.E. since 2005. King power has successfully forged strong relationships with clients and suppliers in the region and has developed solid partnership agreements with international organizations.

King Power operate as one-stop shop, we have wide range of products from wide range of manufactures for specific applications catering particularly to commercial and industrial electrical products. King Power is also unique in that, its sales engineers have experience in the field and therefore very capable of providing technical support to clients in need.

Our Major Clients

Our Major Brands

- Power Solutions like Power supplies, Transformers, DC/DC converter, Buffer Modules, Rectifiers Etc.
- Complete Range of Connector System for Sensors & Actuators in Field

www.murrelektronik.com

 Made in Germany

- Single/Three Phase Transformers with/without UL-CSA Certifications
- Reactance and phase inductance
- Three-phase Electric Starter and Ballast Pumps
- Reactance and Phase Inductance, PCB Transformers

www.tecnocablaggi.it

 Made in Germany

- AC/DC Power Supplies, AC/DC Programmable Laboratory Power Supply
- DC-UPS / Battery Charger
- ESB AC Inrush Current Limiter
- Rack Mounted Power Supply

www.camtec-powersupplies.com

 Made in Germany

- Cam Switches, Changeover and switch-disconnectors, Motorised Changeover and automatic transfer switches
- Pump stations control and protection, Control relays and protection
- Fuse protection

 Made in Germany

Made in Germany

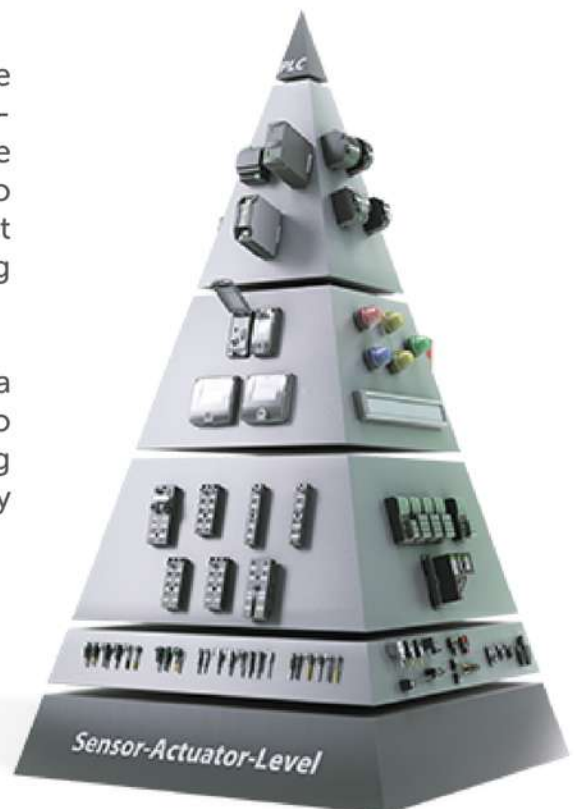

Murrelektronik GmbH is your system partner From a German Manufacturer the switch cabinet via the interface active or passive into the field. We have a widely diversified product range, and can supply you with well thought-out solutions that are made to measure for your applications in the field of industrial automation - from a single source.

Our success has been based on innovative products, highly-developed market and customer orientation, effective logistics, teamwork with commitment and quality awareness, and we are proud of this. This is because our company, which was established in Oppenweiler in 1975, now occupies a leading position in both national and international markets.

As our customer, you are the main focus of our thoughts and actions. Our "stay connected" claim has emerged from this philosophy. It underlines the fact that we consistently orient ourselves to market requirements with regard to **products, performance, price, quality, logistics and service**. We throw a great deal of innovation and flexibility into the mix, orientation that is supported by a cooperative management culture, flat hierarchies and short decision-making routes. **Murrelektronik** GmbH is a globally operating company - which is a particular reason for appreciating the value of connections. More than 2000 employees on every continent are your permanent contacts. Competent, reliable and open to your suggestions and ideas.

Murrelektronik GmbH offers a comprehensive product range for electrical and electronic installation concepts from the cabinet and the interface into the field. All products are engineered down to the smallest detail to ensure they will work well not only with each other but also with your existing system.

Our wide variety of products allows you to build a system that meets your installation needs no matter whether you are talking about lowering installation and/or operating costs or simply putting together a more efficient machine.

UNITED ARAB EMIRATES RISING HIGH WITH MURRELEKTRONIK

305, 277, 260, 234, and 217 Meters. Abu Dhabi's Etihad Towers will rise high in the sky. The construction project in the Persian Gulf is one of the most ambitious skyscraper projects worldwide. And Murrelektronik is represented in Abu Dhabi skyscraper's with our special heat-stable-transformer.

This enormous building complex gives off an unforgettable impression. After completion of this towers they serving various purposes . One of the towers is designed as a hotel that features 400 rooms and 200 apartments; another is an office tower. The other three towers has residential apartments.

There is also restaurants ,convention centres , sports facilities and even boutique shopping mall inside them. For such an immense building complex, fire protection is a top priority. ventilation systems led through fire walls are equipped with fire dampers. when they detect high temperatures, they close automatically and interrupt the air flow preventing flames from reaching other fire protected areas through these channels.

The complete ventilation and air-conditioning system of the Ethihad Tower is implemented by **Voltas Ltd.**  in close cooperation with the **Arabian Construction Company**  with great consultancy of **AECOM**.

These company works closely with **Murrelektronik's** official sales partner in the United Arab Emirates: **King Power Electrical Accessories Trading**.

Voltas'engineers installed Murrelektronik transformers to supply the fire dampers drives with current and voltage. These customer-specific models are especially heat-stable. They reliably supply there required voltage even under significantly higher temperatures. This is an essential contribution to the fire protection in the sky scrapers.

Product Range

- Transformers
- Rectified Power Supplies
- Switch Mode Power Supplies
- Buffer Modules/ Redundancy Modules
- DC Circuit Breaker
- Signal Converter
- Modlink MSVD Control Cabinet Plug Socket

- EMC Filters
- EMC Suppressors

- Relays
- Opto-Coupler Modules
- Solid State Relays
- Active Interface Technology
- Safety - Relay
- Passive Interface Technology
- Eurocard Holder

- Round Plug Connector
M8, M12, MQ12, M23, 7/8"
- Plug Connectors for Food & Beverage
- Valve Plugs
- Flange Plug Connectors
- Distribution Systems M8, M12

 Made in Italy

Tecnocablaggi S.r.l. is an Italian Manufacturer Since from 1980, we are present in the electromechanical market with the production of small and large electrical transformers

We offer our professionalism, paying constant attention to the technological evolution of the materials and to the technical updating for a continuous improvement of the quality of the product, also guaranteeing prompt and punctual deliveries.

Our production ranges from all types of transformers to customer specifications, but also offers a wide range of standard products available in stock.

CERTIFIED QUALITY

Transformers manufactured according to UL approval (file number E305095) ideal for the American and Canadian market.

We can brand our products according to the following regulations:

UL 506 - UL 5085-1 - UL 5085-2

Certified company

E305095

E470286

All our products are CE marked and according to the type are built according to the following regulations:

EN 61558.1

EN 61558.2-4

EN 61558.2-6

EN 61558.2-2

Product Range

Single Phase Transformers

Standard single-phase transformer phase transformer isolation and security for general use. Standard product stock availability with primary voltage 0.230.400.415.440V and 0.230.400V With various secondary voltages.

Three Phase Transformers

Three-phase transformers up to 100KVA power three-phase transformer isolation and security for general use with voltages on customer request Beyond the three-phase transformer, 100KVA power three-phase transformer isolation and security for general use, with powers greater than 100KVA and tensions on customer request.

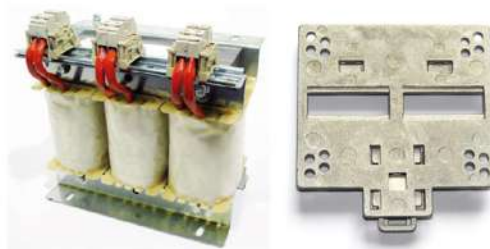

Single Phase Auto-Transformer

Single phase auto transformer for general use Standard voltages 230,400 Volt Input and output voltages reversible Other voltages on request.

Three Phase Auto Transformers

single phase auto transformer for general use Standard voltages 230,400 Volt Input and output voltages reversible. Other voltages on request.

■ ■ ■ Made in Germany

CAMTEC engineers and manufactures Switch Mode Power Supplies SMPS and assemblies for the Automation Sector, Machine Building and Electronics Industry.

The product range comprises AC/DC Power and DC/DC Converter for DIN-Rail, Chassis Mount, Open Frame and Rack Mount Power. Camtec fabricates Programmable DIN-Rail Power Supplies for the Test Automation, similar to a Laboratory Power Supply.

Our portfolio includes Unbreakable Power Supplies, DC-UPS, Battery Chargers and Charging Rectifiers for the modular DC-UPS, up to 60KW. CSE provides Redundant-Modules, Inrush Current Limiters and Electronic DC-MosFET Relays for the Automation Powertrain.

All our products are Made in Germany. Our FAB is regularly inspected by the German TÜV. The Camtec production is certified according to DIN EN ISO9001:2008, CSA and UL norms.

A Camtec Switch Mode Power Supply SMPS is designed for pro-applications like infrastructure, railway, traffic control or military use. Our products provide outstanding data. Camtec power products achieve CE, RoHS and REACH, as well as the new European (Energy-Using Products) EuP Eco-Design Directive.

Products

AC/DC DIN-Rail 1phase 10W ... 1500W

AC/DC DIN-Rail 3phase 480W ... 1000W

AC/DC Programmable Laboratory Power Supply 480W ... > 100kW

AC/DC Embedded & Scalabel Power Supply 2kW ... >100kW

DC-UPS / Battery Charger 480W ... >100kW

AC/DC Rack Mount Power Supply 19 Inch

AC/DC Chassis Mount Power Supply

AC/DC Open Frame Power Supply

ESB AC Inrush Current Limiter 3,6kW ... 48kW

UMS DC FET-Relay Wearless 600W...2,4kW

■ ■ ■ Made in Spain

Since 1944, the product range has been developed by Gawe, thanks for improving teamwork and cooperation for our customers. The result of all these years of experience is a broad capacity for design, development and manufacture of products perfectly adapted to the needs of our customers. Our specialised knowledge is focused on the control, the section and protection power. Our international partners complement our offer with leading technology and innovation. On-line integrated logistics controls, the production, shipments stock and bring security to the supply chain of our customers.

Products

Cam switches

A large range of load break switches, disconnectors, and cam switches...

Changeover and switch-disconnectors

A complete range of enclosed switch disconnectors...

Motorised Changeover and automatic transfer switches

A complete range of motorized changeover switches and automatic transfer switches

Pump stations control and protection

Fuse protection

Fuse protection extensive offer ranging from 0,5A up to 1200...

Approvals    

Kira Leuchten GmbH, the company was founded in 1949. Today it is a company with a high level of know-how and is known in professional circles at home and abroad as a reliable partner. Since November 2002 our company has been certified according to DIN EN ISO 9001 and Ex protection guidelines RL 94/9 EG. We cover the entire range from material procurement to assembly and soldering to quality assurance. We know that lasting success is only guaranteed by continuous development, high quality standards and customer proximity.

We work according to the quality standards of the standard **DIN ISO 9001: 2015** and the **ATEX directive 94/9 / EC**. Structured work processes and compliance with testing and safety requirements within our production guarantees the high quality of our luminaires.
